

SECTION 16
CLEARING AND GRUBBING

The following is added to Section 16-1.03 of the Caltrans Standard Specifications:

Where roots of existing trees are to be pruned, the following specification shall be followed:

All roots pruned shall be cut as smooth as possible with the least amount of surface wood exposed or at a 90 degree angle to the root end cut.

All root cuts made over one (1) inch in diameter shall be painted to seal with an approved type of tree seal paint.
